

## Student Letter Excerpts

Jimmy

“The Excitement of Moving to Another School”

Here in High School we are almost 800 students, for me so amazing, although I have adapted. Some subjects are not more difficult but others are going deeper...the most important things are that I'm getting more knowledge for my future life. Then I will be the one who supports someone who is not able to get basic needs.

Willy

“Sports and Games in Our School”

My aim is to explain about our school team especially the football team. We have won a lot of match up to now. I think we win because we are matured enough on doing exercises of preparing ourselves. Also we have established the volleyball team...many people like this game because it is the matter of using hands to play and it is not so difficult.

Hilda

“Cooperation with Friends”

In our school we cooperate with each other in different activities, such as sweeping, mopping, washing. General cleanliness is important. We work and discuss about different issues of life and also about our own subjects. This keeps life good and we learn how to live with people in the future.

Eliud

Excerpt from letter...

I thank Tutaweza for making possible all that I want to do and I vow you that I will stand stable like a troop so that I can fight for every challenge in this world...I have to prepare my future! I remember the advice from one of my friends called Kenny. He told me that “If your lazy, life is gonna be crazy.” So I am going to fulfill all I have promised.
